

2D Farm World Tileset

READ ME

Thank you for supporting this asset!

We have created this sprites to help you to create your own 2D game.

This asset-pack contains sprites to build different levels for your project.

The sprites are easy to use and you can quickly make your own “2D Farm” game world.

If you have any questions, issues or feedback, then please e-mail us at:

rafmanix.studios@gmail.com

RAFMANIX Team

Version: 1.0

License:

The license terms are subject to Asset Store “Terms of Service” and “EULA” you can find these on the unity website.

Short important overview:

- You can use this asset pack and modify as you desire for your different projects and/or learning processes.
- If you are using our assets, a citation is required to give credit to the creator of the asset, either as a link to the used product or name of the creator.
- It is **prohibited** to resell the asset, graphics or any content associated to the asset to third party or any other stores!

Info:

If you have an older Version of Unity, make a copy of the sprites in your Project folder and set your sprite settings new, so these matches your version of unity.

IMPORTANT:

If you want to make modifications of our textures or sprites, etc... please make a copy and change them as you desire.

Reason: If we upload a new version, your work and modifications are not overwritten.

Thank you!

Settings:

Make sure your texture type settings are:

- Pixels per unit is set to - **128**

so it fits to the Unity Standard Grid.

Or scale it according to your game grid settings!

- We have use “None Compression” for Quality upload on the Asset Store.

You can use the Quality setting & compression you need for your Project

Performance:

Copy the sprites in your Project and choose your settings.

Use the same “**Packing Tag**” for the sprites in your Game Render Layers, so the Sprite Packer reduces your Drawcalls!

If the Sprite Packer is not working to save your Sprites by batching, look at:

Edit / Project Settings / Editor

- **Sprite Packer / Mode** = “Always Enabled” or as you need it!

- or use the new “**Sprite Atlas**” from Unity.

Change the color

You can change the color of your sprites yourself using the sprite renderer.

Examples:

Tile Palette

To paint your game world you need to build a “Grid System” from Unity and set up your Prefabs in the “Tile Palette Window”

If you would like to see an example open youtube and search “2D Farm World Unity Asset Store” or click the video on the Asset Store!

Trees overlap Settings:

To set your Trees or Plants to overlap each other go to:

Edit → Project Settings → Graphics:

Transparency Sort Mode → **Custom Axis**

Transparency Sort Axis → **x 0 y 1 z 0**

Support us:

Please do not forget to write a **review**!

You would help us a lot. Thank you!
